

Power Connector for Dynamics 365

Experience a seamless integration between Dynamics 365 for Sales and Business Central with ***Power Connector for Dynamics 365***. Built using Microsoft Power Automate (previously known as Flow), we have added many more integration points than the out-of-the-box Dynamics Connector, and we are able to customize additional integration points as needed.

Now you can truly have the best of both worlds – Dynamics 365 for Sales with extensive sales automation, business process flows and pipeline management fully integrated with Business Central. ***Power Connector for Dynamics 365*** provides you with the tools you need to automate your sales processes linked to your critical accounting and inventory management information to sell and fill your customer demand faster.

Developed by Bond Consulting Services (BCS), a Microsoft Dynamics Gold ERP and CRM partner for over 20 years, the Power Connector for Dynamics 365 meets our clients' needs for a better option to connect their sales processes and their accounting and warehouse operations. ***Power Connector for Dynamics 365*** is a fully functional integration of two very powerful Microsoft technologies (Dynamics 365 for Sales and Business Central) connected by another fantastic Microsoft technology – Power Automate.

Additional benefits allow you to...

- ✓ Save money and reduce manual workload by automating integration processes
- ✓ Increase accuracy of your Dynamics 365 for Sales & Business Central data
- ✓ Provide improved customer service and professional customer engagement
- ✓ Easy-to-configure and deploy Power Automate-based integrations

Power Connector for Dynamics 365 gives you a robust end-user experience that optimizes your customer information, item products, sales quotes and sales order information effectively. With additional features such as inventory control and customer balance writebacks, we have built synchronizations on ship to addresses, payment terms, and shipping methods to help tighten up workflow efficiencies. This also allows your Dynamics 365 for Sales and Business Central system to handle multi-currency and settle transactions real-time.

Another great feature is that you do not need any additional software or server hosting to accommodate this integration...it is all embedded in your Microsoft 365 infrastructure, built to utilize Dynamics 365 and 365 for Sales faster and more efficiently.
